 Proposal Title: Consolidated Information Sharing Technical Report Network (CISTRN)

SAMPLE ONLY

This is a representative sample not an actual submission.

Company Proprietary

02/23/2025

ABC Corporation

CISTRN

Operational And Performance Capability (Summary)

- Single point for open source data related to combating terrorism (includes newspapers, organizational publications, magazines and websites).
- Data categorization tool for easy analysis and retrieval.
- Quick search for relevance to user
- Secure Windows 2003 network solution; Access controlled.
- User friendly with configurable analysis tools and reporting.
- Input and update by user community to central repository.

Technical Approach

Use state of the market data mining tools developed and in use by ABC Corp with robust search engines to retrieve, analyze, compile and categorize open source data. Develop and demonstrate categorization tool and access controlled secure portal.

Phase One Tasks

- Use company data mining tools to gather data from open sources.
- Develop relevance matrix and categorization algorithms and associated specifications.
- Initiate data search for comparative sample and demonstration with a minimum of 1,000,000 records with full categorization and tagging.
- Develop proof of concept database and demonstrate use.

Phase Two Tasks

- Develop and refine the mathematical computer modeling and algorithm generation tool for document analysis. (Relevance and Category)
- Develop user friendly data sharing system with manual and training to run on Windows 2003 in a secure portal environment.
- Demonstrate and validate the database and user interface against the system requirements specification.

Rough Order of Magnitude (ROM) And Schedule

Phase One

ROM \$20,000, Period of Performance (POP) 4 months.

Exit Criteria: Demonstrated category tool/data retrieval (1,000,000 records).

Phase Two

ROM \$100,000, POP 8 months.

Exit Criteria: Government validation and verification to System Requirements Specification (SRS).

Contract Type | FFP

Total POP | 12 Months

Total Cost | \$120,000

Products & Deliverables

Phase One SRS; Monthly Status Reports (MSRs), Test Strategy/Plan, and Technical Report (Categorization schema and data mining tool).

- Proof of concept database/demonstration.

Phase Two MSRs; Test Report; SRS updates; Final Technical Report; User Manuals; and Training package.

- Prototype database, associated hardware and software licensing for initial setup.

Corporate Contact Information

ABC Corp, Jane Doe, 111 Main Street, Mytown, VA 22102

Phone: (703) 222-8888 **Fax:** (703) 222-8888 **Email:** jane.a.doe@abcinc.com

Partner: Microsoft Inc., Bill Gates, Seattle, WA.

 Proposal Title: Short title to describe proposed effort/solution.

Document Marking

Date Submitted
 Submitter Company Name

Title/Label As Appropriate

- The Quad Chart must include a graphic image, photograph or artist's concept of the proposed solution or prototype.
- The submitter must use labels or descriptive text as needed for clarification.
- Ideally, this area of the Quad Chart will convey the prototype concept, use, capability and any relevant size or weight relationships.

Operational And Performance Capability (*Summary*)

Describe any basic, new, or enhanced operational or performance capabilities the system will provide to meet the requirement.

In bullet form, list key aspects of:

- Performance
- Capability
- Operational use
- Relevant software or hardware specifications
- Interface and/or compatibility

Technical Approach

- Specifically describe the technology involved, how it will be used to solve the problem, actions done to date and any related on-going efforts.
- Briefly describe the tasks to be performed for each phase, if applicable. Bullet lists are acceptable here, but you can also use title and headings to organize each phase.

Rough Order of Magnitude (ROM) And Schedule

- List by phase or task; include costs and POP for each.
- Total cost, POP and contract type must be listed.
- Proposed exit criteria for each phase must be listed.

Phase One Tasks

- Phase one tasking item A.
- Phase one tasking item B.
- Phase one tasking item C.

Products and deliverables

List, by phase, all prototype hardware and software along with the required data; include cost data for the minimum report requirements and additional data deliverables. Additional reporting that is required in performance of the effort could include test plans, test and technical reports, technical data, specifications, requirements documents, computer programs or software, user manuals, drawings, or other data appropriate for the work to be performed.

Phase Two Tasks

- Phase two tasking item A.
- Phase two tasking item B.
- Phase two tasking item C.

Corporate contact information

Provide the submitter's company name, point of contact, address, phone number, and email information. Include significant teaming partners (company or agency name and location) if needed to successfully complete program.
